		(and Array subclass) data objects.																	

Interdes a control of the PDS termand in the PDS termand in Model. It is a namespace container for a logical grouping of classes and attributes and is assigned by the steward. Namespace\_lid is often mapped to the namespace prefix defined in XML documents.

(1) The Namespace and count or create a VIII. If it is maintain level disclosure yeapures the prefix "institute".

(2) The Namespace and count or create a VIII. If it is maintain level disclosure yeapures the prefix "institute".

(3) The Namespace and count or create a VIII. If it is maintain level disclosure the prefix "institute".

(4) The Schoward is them Prefix (spirally has a suffix that includes the version number of the disclosure, for example PDS4. PDS, 1400.

(5) The PDS Changes for the Schoward Count of Schoward County (spirally by a suffix that includes the version number to the common disclosure).

(6) The Schoward Lead field indicates the lead entity within the stewardship group. This entity and the members of the group can change as needed. The steward jud should not change.
